

Genie QS20W

Ref: WP16303 / £11,700.00

Overview

We now have stocks of the popular Genie QS20, a self-propelled stock picking machine that has the ability to drive at its maximum working height of 8.02m. The Genie Quickstock comes with a dual side entry platform which is equipped with a front load shelf. Another nice feature is that the base of the platform is close to the floor which improves the visibility for the operator when manoeuvring the unit in a warehouse or retail environment.

Specification

- * Metric Working Height: 8.02 m
- * Metric Platform Height: 6.02 m
- * Metric Machine Width: 80 cm
